

Jive

Salsa

## Coreopsis Coloropsis™ Series

### GENERAL DESCRIPTION

This new, tender *Coreopsis* series dances with vivid color all summer long. Single flowers are bicolored in zesty combinations and the thread-leaf foliage is bushy, mounding and sturdy. Drought tolerant once established, they are easy to grow with little care.

- **'Jive'**—white blooms with a deep burgundy eye and orange center
- **'Salsa'**—golden yellow blossoms with a wide, bright burgundy eye

### USES

Lots of flowers on mounding foliage produce summer-long color in sunny beds, borders and patio containers. Very low maintenance, they require little water, are deer resistant and will keep looking strong through a light frost.

### GARDENER TIPS

- Plant in well-drained soil.
- Site in full sun.

### PLANT DATA

- Height: 12–18"
- Spread: 24"
- Bloom time: summer–fall
- USDA Zone: takes light frost

### PATENT INFORMATION

Asexual propagation prohibited
