

Coreopsis 'Jethro Tull'

GENERAL DESCRIPTION

This terrific, low-growing *Coreopsis* has well-branched, compact, bright green foliage. It produces an abundance of fluted, bright golden yellow blooms all summer long. A cultivar with great vigor and strong stems.

USES

'Jethro Tull' can be used as a small-area ground cover, in the front of the border or in containers. Because the unique blossoms are fun to view up close, it's great in patio plantings.

GARDENER TIPS

- Plant in full sun in average, well-drained soil.
- Prolong blooming by deadheading flowers as they fade.
- For use as a ground cover, plant on 14" centers.

PLANT DATA

- Height: 12-15"/15"
- Spread: 18"
- Bloom time: Jun-Sep
- USDA Zone: 5(-20°)
