

Erysimum Fragrant Star

GENERAL DESCRIPTION

This shining star glows with very fragrant, bright yellow blossoms and radiant green and yellow, variegated foliage. With a very compact and bushy form, it's a beacon in any garden. Flower clusters are sterile, producing a long blooming season.

USES

With an early and long blooming season, Fragrant Star is ideal in beds, perennial borders and rock gardens. Bushy and compact in form, it is lovely in containers and mixed patio pots.

GARDENER TIPS

- Plant in well-drained soil, preferably slightly alkaline.
- Site in full sun.
- Remove spent flower clusters.

PLANT DATA

- Height: 12–15"/15"
- Spread: 24"
- Bloom time: Apr–Jun
- USDA Zone: 6(-10°)
