

Frenzy

Moxie

Gaillardia Commotion® Series

GENERAL DESCRIPTION

This series of fluted *Gaillardias* is a wonderful commotion of color! The petal count per bloom is higher than other fluted forms, giving a very full, semidouble appearance. With an incredibly long bloom time, the Commotions® show strong hybrid vigor, but with a nicely manageable, mounding habit.

'Frenzy'—Red buds open to blossoms with a yellow and red center. Dark red petals have distinct yellow tips. Color can change with temperature.

'Moxie'—Bright golden yellow flowers with a vivid orange center.

USES

Planted in a perennial border or used as a bold, striking centerpiece in a container, these *Gaillardias* shine all season long with a tremendous number of blooms.

Planted together in gardens and patios, the rich, vibrant colors play off each other for a brilliant display. The long bloom season and quick finish times make this collection the perfect addition to all programs, from spring through fall.

GARDENER TIPS

- Plant in full sun and well-drained soil.
- Provide average amount of water, although these can be drought tolerant once established.
- Feed regularly.
- Remove spent flowers to keep the plant looking tidy and to encourage continuous blooming.

PLANT DATA

- Height: 18–24"/24"
- Spread: 24"
- Bloom time: Jun–Oct
- USDA Zone: 5(–20°)
