

Lithodora 'White Star'

GENERAL DESCRIPTION

A new variation of the popular and well-known *Lithodora* 'Grace Ward', this cultivar has the same evergreen, narrow foliage and slightly mounding, prostrate habit, but the flowers sport a white central star with a bright blue edge. When in bloom, the foliage is nearly covered with these showy, blue and white blossoms.

USES

Perfect for a rockery, or cascading over a retaining wall or down a bank. 'White Star' is especially useful in sunny locations with lean, moist soil, but will tolerate dry soil once established. It makes an excellent ground cover in the Pacific Northwest and similar coastal, temperate climates.

GARDENER TIPS

- Plant in full sun in well-drained, infertile soil.
- Keep evenly moist, but do not overwater.
- Fertilize sparingly.

PLANT DATA

- Height: 6–12"/12"
- Spread: 18"
- Bloom time: May–Jun
- USDA Zone: 6(-10°)

PATENT INFORMATION

Asexual propagation prohibited
