

UNIFORM WEIGHTS & MEASURES

We include a color picture tag in each pot, pak or basket whenever possible. Stick tags are supplied when color tags are not available. Each plant comes with a UPC code. *Skagit Gardens* is helping you to comply with the Uniform Weights and Measures law and the Uniform Packaging and Labeling regulations. The National Conference on Weights and Measures (NCWM) maintains this model law and its implementing regulations. The National Institute of Standards and Technology (NIST) provides assistance to the Conference. Enforcement of the law and regulations rests exclusively with state, or subsidiary government, weights and measures personnel.

DECLARATION OF IDENTITY

This declaration must describe the product: in this case, the name of the plant.

DECLARATION OF RESPONSIBILITY

The declaration of responsibility provides the consumer with the location of the vendor, distributor or retailer of the product. If the product is offered to the consumer by any business other than the grower of the plant, there must be a declaration of responsibility.

DECLARATION OF NET CONTENTS

This declaration must describe the contents in terms of weight, measure or count. For transactions within the industry, it is common practice to refer to the *volume* of the container. It is recommended that industry businesses describe the container's net contents in U.S. measurements: fluid ounces, pints, quarts and gallons—and in metric: milliliters and liters.
