

Agastache Nectar™ Series

GENERAL DESCRIPTION

These colorful *Agastaches* bloom over a long season with nectar-filled blossoms. Compact green foliage supports heavily blooming spikes dense with flowers. Hybridized by *Florensis*.

Apricot, Grape, Grapefruit, Orange and Raspberry

USES

The compact habit is ideal for containers, and the abundant flowers fill a deck or patio pot full of hummingbird and butterfly food.

GARDENER TIPS

- Plant in well-drained soil.
- Site in full sun.
- Remove spent flowers to prolong blooming.
