

Blue Lace

Double Innocence

Pagan Purples

Sweethearts

Delphinium New Millennium Series

GENERAL DESCRIPTION

The New Millennium *Delphiniums* are bred for exceptional garden performance. They are considered to be long lived and more heat and humidity tolerant, while retaining their cold hardiness. Sturdy, strong-stemmed spikes packed with loads of richly colored flowers, often double or semidouble, are outstanding in the garden, and a florist's delight.

'Blue Lace'—light sky blue, tinted pink

'Double Innocence'—white with white bee, sometimes tinged with green

'Pagan Purples'—dark bluish flowers with white or chocolate bee

'Sweethearts'—medium to light pink with white bee

USES

Classic perennials for the back of the sunny border in a traditional English garden, the New Millenniums are ideal wherever tall and stately, very showy flowers can be seen to best advantage. While these are more tolerant of heat and humidity than most *Delphiniums*, they are best in cooler climates with rich soil that is not too acidic.

GARDENER TIPS

- Plant in full sun.
- Amend soil with lime if very acidic.
- Remove spent flower stems to promote reblooming in fall.

PLANT DATA

USDA Zone: 3(-40°)

Spread: 24"

Bloom time: Jun-Sep

Height varies:

'Blue Lace'—48-72"/72"

'Double Innocence'—36-60"/60"

'Pagan Purples'—48-72"/72"

'Sweethearts'—36-60"/60"
