

Ringsabell Indigo Blue

Ringsabell Mulberry Rose

Campanula Ringsabell Series

GENERAL DESCRIPTION

Bells with a perky scalloped edge are suspended from slender stems that rise above the medium green foliage. Compact and tidy, this *Campanula* series does not run rampant like others of its type, but spreads slowly. *Introduced by Amerinova.*

'Ringsabell Indigo Blue'—violet blue

'Ringsabell Mulberry Rose'—rose pink

USES

The Ringsabell *Campanulas* provide lovely summer color in beds, borders and containers, and may rebloom in the fall. Easy to grow with adequate moisture, their compact habit makes them an ideal addition to any perennial garden.

GROWER NOTES

The following information is based on our own experience with this crop in the Pacific Northwest. Growth will vary depending on location, climate, growing medium and cultural practices. As always, where chemical use is involved, read the labels, follow the instructions and practice careful trialing methods.

- The highest quality plants are produced by allowing the crown to fill the pot prior to bloom. This can be achieved by planting outdoors in late summer or early autumn, or by planting in a cool greenhouse in late winter or very early spring. Protect from sudden early freeze until plants are hardened off. For best results in severe winter weather areas, protect from extreme cold or wet in a greenhouse or cold frame.
- Use a well-draining potting soil containing a slow-release, low to medium-rate fertilizer charge, or provide a balanced liquid feed with 200 ppm nitrogen while plants become established. Withhold feed as cold weather sets in to harden off plants for winter. Resume regular feeding when new growth emerges in spring.
- Plant the crown at soil level, no deeper, or problems with crown rot could develop. A preventive fungicide drench at transplant is recommended.
- Pest problems are few, but watch for aphids, thrips, and mites during the growing season.
- Growth regulators are not needed on these compact selections.
- Mulberry Rose tends to be a more robust grower than Indigo Blue.

PLANT DATA

- Height: 6" foliage, 15" flower
- Spread: 15"
- Bloom time: late spring–summer
- USDA Zone: 5(-20°)

APPROXIMATE FINISH TIMES

- Gallon from 72-cell liner: 28–32 weeks for overwintered plants
- Gallon from 72-cell liner: 14–16 weeks from January transplant

PATENT INFORMATION

Asexual propagation prohibited
