Knautia macedonica

Genus Knautia

Variety macedonica

Exposure Full Sun

Height 18-24"

Spread 24"

Description Loads of small, deep crimson, pincushion flowers on wiry, branching stems bearing lobed, gray green foliage. Great for filling in among other perennials or in tubs.

Care Easily grown in average soil with moderate water. Prefers cool nights. Fertilize sparingly in spring. Remove spent flower stems.
