

Thelypteris decursive-pinnata Japanese Beech Fern

Genus	Thelypteris
Variety	decursive-pinnata Japanese Beech Fern
Exposure	Part to Full Shade
Height	12-24"
Spread	18"

Description Upright, dark green, triangular, light and dark green fronds form a tidy, coarse-textured mound. A vigorous filler for woodland and shade gardens or containers.

Care Easily grown in moist, organically rich, slightly acidic soil with regular water. Fertilize and cut back old fronds in spring.

Deer Resistant

Perennial

USDA Hardiness Zone: 4(-30°)
