Mahonia repens

Genus	Mahonia
Variety	repens
Exposure	Full Sun to Part Shade
Height	18-24"
Spread	48"

Description Creeping, evergreen shrublet with blue green, holly-like leaves, yellow flowers, and grape-like, blue berries. Suitable as a large-scale groundcover or for erosion control.

Care Will handle dry shade in acidic, humusy, well-drained soil. Water deeply until established. Protect from drying winds.
